

subject: Letter of recommendation for Maurice Ridder

date: 10 oktober 2013

To whom it may concern,

Maurice Ridder has worked as a trainee from January until July 2013 in our office on several projects. Maurice is an enthusiastic and open-minded person who learns very fast and is dedicated to his work. He is able to cope with stressful situations and delivers independently different solutions for design issues. We also appreciate his capacity to communicate, his creativity and his inventiveness.

Maurice, during a period of six months, collaborated mainly on two projects: an urban research- and eventproject in the harbor area of Rotterdam and the design for a pop-up teabar in a public park in Rotterdam.

As a part of the research- and design team Maurice proved to have good research and graphical skills and a lot of personal initiative in the process. He also mastered 3d modeling programs, able to use for design as well as presentation phase.

We expect him to further develop his skills, while enriching his knowledge in new challenging architectural firms. It is our pleasure to recommend Maurice Ridder for a position in your company.

Sincerely,

Sander Hazevoet - Vitibuck Architects
